

Workbook ASSIGNMENT 8.1

A. Writing melodic intervals

Write a whole note on the correct line or space to make each interval specified. Don't add sharps or flats. Check your answers by counting the letter names from the given note to the one you have written. Remember to include the given note.

Write the specified melodic interval above the given note.

Write the specified melodic interval below the given note.

B. Identifying interval size in context

For each circled interval, write the correct interval size in the blank provided.

P5	m2	P5	m3	M3	M7	M3	m6

D. Writing major and perfect intervals

Write the specified interval above the given note. First write a whole note to create the correct interval size, then add an accidental (if necessary) to produce the correct quality. Don't change the given note.
